

## SHORT LEARNING PROGRAMME:

# HOSPITAL WASTE MANAGEMENT

The South African hospitals are usually burdened with the collection and transportation of vast amounts of waste, hence waste management is becoming more and more crucial. Learners will be equipped with knowledge and skills in hospital waste management; and this is one part of the critical environmental management aspects. This SLP will also partake in contribution on entrepreneurial drive foreseen by the country.

### Who Should attend

- Individuals who are interested in maintaining hygienic and cleanliness in the hospital environment.
- Community members interested in healthcare waste,
- Medical facility staff members in healthcare services
- Workers at waste management companies.

### Brief content overview

- Introduction on Hospital Waste Management.
- Importance to maintain clean environment in hospitals.
- Hospital Waste Management Guidelines.
- Quality Assurance.
